KATHIRAVAN K

Full-Stack Developer
+91 8124948529 | kkathiravan709@gmail.com | Chennai, India
https://www.linkedin.com/in/kathiravan-kamaraj

PROFESSIONAL SUMMARY

Full-Stack Developer with nearly 4 years of experience building production applications with Angular, TypeScript, C#, and ASP.NET Core (.NET 8) on SQL Server and Azure. Delivered solutions across healthcare, e-commerce, travel, and banking, working in Agile teams. Currently exploring Python and Generative AI.

PROFESSIONAL EXPERIENCE

Software Developer II | Kranium Health, Chennai **Dec 2023 – Present**

- Delivered 7 production modules end to end (booking, order management, scheduling, real-time tracking) using Angular and ASP.NET Core Web API (**.NET 8**) microservices, adopted by 15+ client sites across India and abroad.
- Built layered ASP.NET Core services with EF Core, JWT/OAuth, and RBAC, covered by xUnit tests and containerized with Docker.
- Architected **Angular (v18 - v20)** dashboards with **NgRx** state management and a drag-and-drop summary builder for multi-location executive reporting, cutting manual reporting effort by 20%.
- Engineered a **WebRTC** video-calling platform on ASP.NET Core Web API with a custom WebSocket signaling server (rooms, SDP/ICE exchange, waiting-room approval) and STUN/TURN, sustaining a <2% call drop rate across 300+ daily sessions.
- Cut API response latency from 300ms to 50ms on a 200GB production database through SQL query tuning, **EF Core** optimization, and **Redis** caching.
- Implemented an event-driven claims-processing workflow (verification to remittance) on **RabbitMQ** with asynchronous message validation and FHIR/HL7 integrations, handling 500+ claims monthly and reducing manual entry errors.
- Remediated 40+ vulnerabilities (SQL injection, XSS, session fixation, sensitive data exposure) found in penetration testing, helping the product earn a national compliance certification.

Software Developer | Tamu Info Tech, Madurai **Dec 2022 – Nov 2023**

- Developed web applications with ASP.NET Core Web API and Angular for international clients Italia Rail and HiLo Maritime, delivering on sprint commitments across cross-timezone Agile teams.
- Shipped Aquarium Showcase, a cross-platform catalog for 500+ products built with Angular and Electron (Windows, macOS, responsive web), reducing manual customer demonstrations by 25%.
- Engineered Zuna, a full-stack e-commerce platform on ASP.NET Core Web API with **JWT authentication**, user management, and RBAC, supporting 1,000+ monthly active users.
- Designed a flight ticket booking platform with user management (JWT authentication, RBAC), secure payment gateway integration, and transaction-safe concurrent booking that prevents double-booking under high load.
- Implemented an **Automatic Number Plate Recognition** system using C#, ASP.NET Core Web API, and OpenCV, achieving 95% recognition accuracy in production.

EDUCATION & CERTIFICATION

B.E. Mining Engineering | College of Engineering Guindy, Anna University (CGPA 8.04) **2017 – 2021**

Self-Directed **Full-Stack Training (Angular, C#, ASP.NET)** **2021 – 2022**

TECHNICAL SKILLS

Frontend: Angular (v18–v20), NgRx, RxJS, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: C#, ASP.NET Core Web API (.NET 8), Microservices, EF Core, LINQ, JWT/OAuth, RBAC

Databases & Caching: MS SQL Server, PostgreSQL, Redis, Query Optimization

Messaging & Real-time: RabbitMQ, WebRTC, WebSockets

Version Control & Containers: Git, GitHub, Docker

Tools & Platforms: Postman, Swagger, Visual Studio, VS Code, IIS, Nginx, Burp Suite, sqlmap, GitHub Copilot
